The 28th edition of the Classic Car Auction Yearbook covers the most important auctions from 1st September 2022 to 31st August 2023: 10.737 cars of 377 different Makes, illustrated by 738 color photos. Each car is listed with year, model, bodybuilder, chassis number, estimate, hammer price in GB£, US\$ and €, sale date and place, lot number and auction house, and a short description; furthermore, it reports the results in US\$ achieved by the same car if offered at auction in the last 30 years.

Considered by many "the Bible in the field", the Yearbook contains the market analysis by the representatives of the most important auction houses, the author's comment with graphs and statistics of the last 30 auction seasons, the most coveted Makes, countries and periods, total auction sales turnover, percentage of cars sold, average price achieved by some iconic models and, at the end, the Top 5 cars and the overall Top 20 since the 1993/1994 season.

An absolute must for every professional, collector and enthusiast.
